🌐 Portfolio

PROFILE

I am an active 2nd-year student in the Information Technology field with a focus on web development, user interface (UI) design, and databases. I am skilled and experienced in creating basic website projects and user-centric designs, demonstrated through my involvement in various academic and personal projects. I believe that the internship will be a valuable opportunity for me to expand my knowledge, strengthen my skills, and contribute in a collaborative and dynamic work environment.

EDUCATION

Information Technology - Semester 5th   **08/2022 - Present**
President University   **CGPA 3.61/4.00**
Related Courses:
- Web Programming - Semester 1
- Database System - Semester 2
- Server-Side Internet Programming - Semester 2
- Information Management - Semester 5

COMMITTEE EXPERIENCES

Liaison Officer, Cultural Festival 2023   **11/2023**
- Efficiently coordinated event schedules, ensuring 100% adherence to planned agendas and timely execution.
- Effectively guided events for 30 participant groups, ensuring smooth execution and seamless transitions throughout the event.
- Demonstrated strong problem solving skills by promptly addressing and resolving challenges faced by competition participants, enhancing operational efficiency and satisfaction.

Liaison Officer, Hackathon Fab Creation 2022   **11/2022**
- Ensured smooth event execution by supervising 10 participant groups and facilitating guest engagement, resulting in positive feedback and an enhanced event experience.
- Established effective communication channels between participants and organizers, fostering a collaborative atmosphere and ensuring timely information dissemination.
- Effectively communicated relevant details to participants with precision and timeliness, improving overall understanding and streamlining the participant experience.

PERSONAL PROJECTS

Database System   **04/2023 - 05/2023**
- Designed and implemented customer-centric websites with intuitive user interfaces using JavaScript and CSS, increasing user engagement and accessibility.
- Integrated database connectivity features using PHP and MySQL, efficiently managing over 100 entries and ensuring data integrity.
- Developed robust web-based administrative tools, enabling comprehensive data management, including the ability to add, edit, and delete database entries, thus improving operational efficiency by 40%.

Economic Survival: Business Creation   **09/2022 - 05/2023**
- Effectively established partnerships with 2 stores as vendors for our application.
- Acquired skills in collaborative teamwork to achieve shared objectives effectively.
- Demonstrated problem solving abilities in overcoming challenges encountered during entrepreneurial ventures.
- Cultivated self discipline to maintain perseverance and continuous improvement.

BOOTCAMP EXPERIENCES

Wireframing in UI/UX Design by MySkill
05/2024
- Accomplished the design of 3 engaging web pages based on provided case studies.
- Executed the use of Figma to create attractive and modern website designs as per assignment requirements.
- Implemented foundational knowledge of effective wireframing to support the website development process.

Backend Development Fundamental by MySkill
05/2024
- Developed and implemented 7 essential backend programming concepts, applying best practices and methodologies commonly utilized in the industry.
- Gained practical experience in online programming through the use of Replit software, allowing for the development and testing of code in a collaborative environment.
- Enhanced foundational understanding of backend processes, which are crucial for efficient data management and system functionality, ensuring data integrity and streamlined operations.

Software Engineering by RevoU
05/2024 - 06/2024
- Created 1 program to display message bodies combining HTML, CSS, and JavaScript.
- Improved understanding of frontend development concepts, focusing on the importance of creating user-friendly designs before the backend data processing phase, ensuring a smooth user experience.
- Sharpened problem-solving skills crucial for addressing issues that arise during program development.

SKILLS

Hard Skill : Microsoft Office, Canva, Figma, CSS, JavaScript, HTML5, PhpMyAdmin, SQL Query, Git.
Soft Skill : Learning Initiative, Teamwork and Collaboration, Problem Solving Abilities.
